

I am deeply concerned about the FCC repealing the rules that prohibit a media company from owning both a newspaper and a media outlet in the same geographic area. We have already had way too much consolidation of media and this is another step towards controlling the coverage of news by fewer and fewer companies. I don't know why the anti-trust laws have not kept this activity from going on but please, stop now. Further action along this line is a damaging thing for the citizens of this country.
